What if you are unable to leave your house or don't have access to a park? Here are a few ways to experience nature in your own home

**Pick a "sit spot"**
Find a space outside where you can consistently rest and interact with nature. It could be in your backyard, your porch, or balcony!

**World-Watch**
Find a window view that you designate as a space to relax and experience the outward facing world. You can look for birds, watch clouds, or even people watch!

**Get some plants!**
You can buy indoor plants, grow your own plants from seeds, or propagate plants by placing a plant clipping in a bit of water until roots form
